

THE WORLD OVER

ROYALTY FINANCING PROFITS

By yielding \$50,800 as revenue from production for 24 days in February, B. and B. Royalties will, largest crude oil in Canada, paid the equivalent of nearly one-third of the cost of the well, according to the secretary of the company. Cost of the well was about \$150,000 and cost of producing equipment was about \$20,000.

ROYAL MAIL WINS "NATIONAL"

AIN'TREE, England—A new champion of the jumping world was crowned last Friday when Royal Mail, fencing strongly and making only the slightest errors over Aintree's treacherous 4 1-2 miles, galloped home the victor in the 100th anniversary running of the Grand National.

Two sure-footed mares, Colleen and Pucka Belle, furnished the only rivalry for Royal Mail in the closing phases of the race, and these finished second and third respectively, their performances restored the reputation of the "fair sex" in the Aintree country where no female horse has won the blue ribbon of steepchasing since Shannon Lass outjumped and outran a field of 21 at the turn of the century.

BOY SCOUT NEWS NOTES

BY THE S. M.

Lighting a Fire Without Matches

A method developed by P. L. Harry Honey of the 14th Edmonton "Bulldogs", has considerable merits. This week I will deal with the preparation of the "finder", and next week I will tell you how to use it.

Get a handful of mechanics cotton waste and set it alight with a match. Tumble it about to make sure that it all becomes burned to a blackish sort of ash. At this stage parts of it will begin to glow—now is the time to press out all sparks with a flat stone, piece of board, etc. This black "mess" is your tinder, and must be carefully gathered up and stored in a tin box for future use.

You also require an old fire (or a broken piece of one) and a good flinty stone—the more sparks it throws the better the stone, and the quicker the fire gets going.

Don't forget the Concert. If you want to go to camp this year, your parts must be learned immediately so that you may be taught elocution and recitation. If you don't know what those words mean—consult your dictionary.

COURT TECHNICALITY IS REASON FOR THE LIGHT JAIL SENTENCE

Hearing Must Be Granted Within
24 Hours of Arrest

The Criminal Code provides that any prisoner held in custody shall appear in court within twenty-four hours after his arrest, or, in the case of Sundays or public holidays, shall appear the following day.

Due to the fact that members of the Provincial Traffic Board took possession of the Drumheller court house last Monday, Magistrate O'Connor could not hold court. Because there was no place where court could be held the Magistrate declared there would be no hearing that day. Two cases awaited the decision of the Magistrate, and because the accused had to remain without a hearing for more than the 24-hour period they were technically free for the asking.

Harry Moodie, who was found guilty of breaking into the Farmers' Exchange a week or so ago, was one of the prisoners held the bars for longer than the prescribed time, and when sentence was passed the Magistrate gave him three months, in place of the previous conviction. Magistrate O'Connor remarked that a light sentence was being imposed because of the consideration of the accused in not demanding his freedom.

PREPARE FOR 'HOPPER PLAGUE THIS SUMMER

Alberta agricultural officials are preparing for their annual battle with grasshoppers. Admitting that the extent and severity of the plague would depend on climatic conditions, departmental officials figure it "might be fairly heavy" this year. Observations were based on tests made last autumn, following an unusually dry summer. This year's charts indicate Lethbridge as the centre of the southern area where the hoppers are expected in numbers, while Drumheller is the focal point in the north-central section. Provided the spring is late and wet, the infestation may be limited to recognized areas. Should it break early and be comparatively dry these districts may extend some additional distance to the north and east, it was stated.

THE HUMAN RACE

The human race, through ages and centuries of experience, adjusts itself to adversity more easily than to prosperity. The reason is that those who are successful in the race of struggle to preserve itself are the descendants of countless ancestors who learned to take it on the chin.

TEN INCHES OF SNOW FALLS

On Friday night the district was blessed with a heavy snow fall which reached a total depth of almost ten inches on the level, bringing joy to many a farmer's heart, for the moisture was an absolute necessity.

It is estimated that about one inch of moisture fell in Friday's storm. Colder weather followed the snow storm, although the temperatures are well above zero. Tuesday night a high wind caused considerable drifting and the roads were blocked for a time. However, all signs point to a warm spell and with the gradual melting of the snow the soil will get a good soaking.

As soon as the land is dry enough seeding will get under way now. Before the snow many farmers were lamenting over the dryness of the soil, but this has now been overcome.

MR. B. C. DOWNEY WILL BE NEW MANAGER OF BANK OF MONTREAL

The Bank of Montreal has announced the appointment of B. C. Downey as manager of the local branch. He succeeded C. L. MacGregor who has been transferred, in the same capacity, to Semans, Sask.

Mr. Downey was born in Ontario and received his education at Frobliser, Sask., where he commenced his banking career. He has been assistant-in-charge of the Hazelridge, Sask., office and manager of the Lake Neelon, and Coyon, Sask., branches. For the past two years he has been attached to the Weyburn, Sask., office.

Mr. Downey has been an active participant in community affairs and in recreational circles.

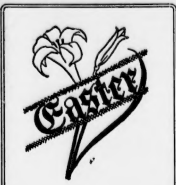

Mr. MacGregor leaves immediately to take up his new duties and in the meantime Mr. R. J. Fairbairn, former manager of the Carbon branch and now in Calgary, will take charge of local banking facilities.

LONG YEARS AGO

March 27, 1924

Born, to Mr. and Mrs. H. Dolphin, on Monday, March 24, a son.

The local branch of the Bank of Toronto is closing its doors on April

Easter comes at a glad season of the year. The festival itself, is both commemorative of the resurrection of Jesus Christ and as a memorial to the atonement wrought by the death of the Master upon the cross.

It is hailed with great acclaim in all Christian churches of the world. In Greek and Latin and in the languages derived from them Easter was known as "Pascha," "Pasch," "Pasqua," "Pasqua," "Pasqua," etc., from the Chaldean word, "Pascha," the equivalent of the Hebrew "Pesach." The "Destroying Angels" act is recalled by the last name in "passing over" the households of the Hebrews when he smote the Egyptians, as disclosed in the twelfth chapter of Exodus.

This year Easter will fall on March 29th. The way by which Easter is determined is that of the first Sunday after the paschal full moon—the fourteenth day of the calendar moon, or the full moon which happens upon or next after March 21; and if the full moon happens on a Sunday, then Easter day is the first Sunday following.

1, according to the Manager, B. F. Joyce.

Acme is putting on a boxing tournament on April 2nd.

A crowd of hockey fans gathered in Morrison's Drug Store on Tuesday evening to hear the results of the Calgary-Montreal game.

The Hesketh Mercantile Co. has taken on harness dipping as a side-line.

The interior of the Carbon Hotel has undergone considerable improvement since the house was taken over by the new manager, Mr. Edwards who plans many improvements.

Where There's a Cow There's Also a Woman

"I shall bring to thee a thousand pure springs, running toward the pastures that give food to the child." Thus, in the Zend-Avesta, spoke Zarroaster, high priest of the ancient Persian sect, whose votaries worshipped the cow. It is possible that the Zoroastrians introduced the cult among the Hindus, for they migrated to Hindustan, perhaps because of religious persecution. Be that as it may, the cow remains an object of veneration to the modern Hindu.

As a sacrificial animal the cow held a prominent place, and Keats, in his "Ode to a Grecian Urn," describes "that heifer loving to the skies, and all her silken flanks with garlands drest." Something akin to idolatry is manifest in the attitude of many a cattle breeder of today, whose classic cows are bedecked with the coveted red and blue ribbons at the fair. The cow wears her garlands modestly, unobtrusively, and administers to the needs of the crowd, unconcerned that her R.O.P. shows she produced more than twelve times her own weight of rich milk in a single year, besides of her long pedigree which might be the envy of many a lord; but content if she be furnished an ample supply of palatable, nutritious food, a pure spring, and a comfortable stall at night.

Banished from Island Three years ago the writer realized his ambition to visit the Sacred Isle of Iona, one of the Inner Hebrides lying off the coast of Mull, Argyllshire, Scotland. To this island, from Ireland, in the year 663, came Saint Columba.

Complacent Cows

A cow contentedly churning the curd is the climax of complacency. For a man to ruminate is to meditate, and if he be a dairymaid his meditations will concentrate on the welfare of his cows and how they may bring more cash to his coffers. Pastures rich in protein and minerals are essential to the well-being of the modern high-powered dairy cow whose produce, in the forms of milk, butter and cheese, mankind is so dependent.

Pastures more plentiful, more palatable, more nutritious, and more lasting security, are assured by the timely use of fertilizers high in phosphate, coupled with proper management of the grazing. So much importance is now attached to the subject that the international, national and provincial committees are occupied with its study, and several of the leading dairymen of the British Isles will attend the Fourth International Grassland Congress at Aberystwyth, Wales, next July.

MASSEY-HARRIS PICTURES SHOW ED. SCHELL FARM

The Massey-Harris Farm Machinery Company is giving Carbon and the Schell brothers considerable publicity this spring in its annual showing of interesting features in connection with its advertising campaign being conducted through motion pictures.

Throughout many towns in Alberta and the west a feature of the talking pictures shown is the five rubber-tired Massey Harris tractors all at work at one time on the Ed Schell farm south of Carbon. On Saturday afternoon of last week these pictures were shown in Carbon through the sponsorship of the local dealer, Mr. Jas. Flaws.

It will be remembered that last spring the five Schell boys bought a certain tractor between them each taking one machine. These are the tractors shown in the motion pictures.

WEEKLY COMMENT ON THE WORLD OF WHEAT

BY H. G. L. STRANGE

Improve quality! Keep down costs of production!

These should be the watchwords for Western Canadian farmers, for all who are their friends, and who are, of course, keenly interested in the farmers' welfare.

Very definite, and it would seem, successful efforts are being made not only to maintain, but to improve the wheat quality; but how about reducing costs of production? Unfortunately, in very this direction is now being done, yet the reduction of cost is just as important as the improvement of quality—Can costs be reduced, or at all events stopped from rising still further?

It will not be easy, but I for one believe it can be done, even though costs of production actually are now rising as revealed by the Seale Index which keeps accounts, month by month of the costs of the things farmers buy.

More will be said in later articles about methods which might be adopted to reduce costs. In the meantime anything that will increase the yield per acre will definitely help. The use of Leyton and Ceresan for treatment against smut and root rot diseases, also the use of fertilizer, which increases yield and brings about earlier maturity, are splendid ways of reducing costs of production.

Following factors have tended to raise prices:

Japan, Mexico and Greece purchase Argentine wheat. Italy purchases more Argentine and Rumanian wheat. Germany and Great Britain continue to buy Argentine, Turkey, Australian, Indian, Yugo-Slavian and Canadian wheat. Spain purchases vast quantities of wheat. Supplies of crop prospects in India. Grasshoppers

ORIGINAL SHAREHOLDERS OF CARBON EXPLORATION CO. STILL RETAIN STOCK

D. A. McNeill Filed on Average
On Behalf of Original Co.

A further announcement last week regarding the filing on 31,700 shares of oil land in the Carbon district was made late Wednesday when Mr. D. A. McNeill of Calgary informed Mr. Greenan that he had filed on behalf of the shareholders of the old Carbon Exploration Company, along with a firm of Calgary Brokers, on the 31,700 acres near Carbon.

This announcement means that the original shareholders in the Carbon Exploration Company are interested in the new deal to the extent of 50 per cent.

Further information will be available for our next edition.

DRIVERS DIM CAR LIGHTS

Important changes in the Vehicles and Highway Traffic Act, which are of interest to all motorists and others using the highways of the province, are provided in an amending bill introduced in the legislature.

Probably the section of greatest interest is that which makes it compulsory for headlights on motor vehicles to be dimmed or dropped. This must be done at a distance of not less than 350 feet.

It is recalled that in recent months, strong protests have been expressed at meetings over the menace of glare beams and a lighted tail light or rear reflector when being ridden on a highway at night.

The bill also contains another important section which provides that all motor vehicles shall be equipped with adequate brakes. Standards of adequacy are prescribed while police officers may inspect brakes of any vehicle operating on the highway and may order it to be brought to a break adequate forthwith.

Another section makes necessary the reporting to a peace officer of all accidents in which a motor vehicle is involved, if any injury to person or property is caused by the accident.

causing concern in Australia. French farm falling in value.

Following factors have tended to lower prices:

First official Indian rice estimate larger than year ago. German buyers must put seven percent corn meal in all wheat bread. Weather reasonable and present moisture supplies sufficient to buy Argentine, Turkey, Australian wheat and rice still substantial with navigation about to reopen. India preparing to make substantial wheat exports.

TOWN & COUNTRY

Personalographs

Tomorrow is Good Friday and a public holiday. All places of business will be closed.

Mrs. C. Friesen was a business visitor to Calgary on Friday.

Mrs. Jas. Smith left on Sunday to spend a couple of weeks visiting with her parents at Kelowna, B.C.

Mr. and Mrs. H. C. Willson motored to Calgary on Sunday.

Mrs. C. Green arrived from Calgary Saturday and spent a couple of days visiting with her aunt, Mrs. Elliott.

Inspector Frame of Drumheller was a visitor in town last week.

Mrs. S. F. Torrance, Elaine and Marion, and Mr. Clarence Hay were Calgary visitors the first of the week and returned Tuesday night.

Mrs. T. Gutterad has moved into the house formerly occupied by Mr. and Mrs. Aaron Klassen. Mrs. Gutterad and son will remain in Carbon until the end of the school term.

Mrs. E. Sellens arrived Sunday from Carstairs and is visiting with her parents, Mr. and Mrs. C. H. Nash. Mr. Sellens has been transferred to the Edmonton branch of the Bank of Montreal and is now in the Capital City.

Spring must be here for the annual paint-time is at hand. Among the local business places recently undergoing a coat of paint or kalsomine are: McKibbin's Drug Store, Carbon Hotel and Garrett Motors.

Magistrate V. B. Hawkins returned to Carbon Saturday after spending the winter visiting with friends at Fincher Creek.

We understand that a branch of the People's League of Alberta is being formed in Carbon.

Jerry Picard, now of Turner Valley, was a Carbon visitor Sunday.

Born, to Mr. and Mrs. Matt Kay on Sunday, March 21, a son.

A. F. McKibbin has installed a window between the store and dispensary.

Perry Johnson, manager of the Builders' Hardware Store, motored to Calgary on Tuesday. He was accompanied by his sister, Betty, Viola Embree and Olive Phillips.

Mr. C. L. MacGregor leaves today to take over the management of the Semans, Sask., branch of the Bank of Montreal.

Bill Edwards arrived in Carbon this week, on holiday from bank duties in Calgary.

R. C. GOLD COINS VALUABLE

Among the world's rare coins are ten and twenty-dollar gold pieces turned out by the British Columbia Assay Office in 1862.

Gold was discovered in British Columbia in 1857, when the Province was a Crown Colony. The Governor applied to the Home Office for authority to open an assay office. This was opened in 1860 in New Westminster. The following year permission was given to this office to coin gold in ten and twenty-dollar pieces.

In 1862 some trial pieces were turned out, but after striking these few pieces, the workers decided to stop striking on their own account and demanded higher wages. The mint accordingly closed and the strikers were soon digging for gold instead of mining it.

Some specimens of these 1862 gold coins are still in existence. They have more than once been offered for sale at from \$8,000 to \$10,000 each.

George—My boss is one of the three Musketeers; he says I Musketeer at nine o'clock.

Snicklefritz-----

Plumber—Have you brought me your references to see?

Applicant—No, I'll go back for them. Plumber—You'll do.

Old Gentleman (seeing the small colored boy was having some trouble in getting away with the large melon he was trying to eat): "Too much melon, isn't it, Rastus?" Small colored boy: "No, sah, boss; not enough niggah."

When a man is wrong and admits he is wrong, he has courage. When a man is right and admits he is wrong, he's married.

Cook—That oyster I've used for two weeks is pretty flabby. What do we do for soup today?

Restaurant Owner—You ought to know. Use the old bean.

Wife—Will you love me when my hair has turned to silver?

Hubby—Why not? Haven't I stuck to you through brown, red and black?

She: "I'm going to write to my husband. How shall I sign it?"

He: "Sign it 'your loving wife'."

He: "But that's not true!"

He: "It'll be true in a minute, baby"

CHRIST CHURCH, CARBON

Services will be held as follows:

"Somebody
to see you!"

IF EVERYBODY with something to interest you should come and ring your bell, what a nuisance it would be. Think of the swarming, jostling crowd, the stamping of feet on your porch and carpet!

Every week we know of many callers who come to see you. They never jangle the bell—they don't take up your whole day trying to get your attention. Instead, they do it in a way that is most considerate of your privacy and your convenience. They advertise in your newspaper!

In this way you have only to listen to those you know at a glance have something that interests you. They make it short, too, so you can gather quickly just what you want to know. You can receive and hear them all without noise or confusion in a very few minutes.

In fairness to yourself look over all the advertisements. The smallest and the largest—you never can be sure which one will tell something you really want to know.

conditioned sleepers and lounge cars were also provided for the "Montaineer" service between Chicago, St. Paul, and Vancouver. Some idea of the work connected with air-conditioning is given by the pictures above. Cars are stripped, as in lower right, and insulated to keep out heat, cold, and dust. The pictures at the left show some of the material being placed in the cars. The satisfaction written all over the face of the young lad in "Lower 5," expresses the public's feelings toward this new type of controlled comfort. In the centre is a close-up of the control equipment, by which, as the arrows indicate, the individual can regulate the volume and direction of the flow of air.

Angus Shops at Montreal are handling with activity these days as the Company continues its comprehensive programme of air-conditioning. In the current year, air-conditioning equipment will be added to 134 cars, including standard sleepers, dining cars, tourist sleepers, parlor cars, and day coaches, and these, in addition to the 130 cars air-conditioned in 1936, will permit a very considerable extension of air-conditioned services throughout the Dominion.

Provision is made by the 1937 programme to provide air-conditioned dining cars on all trains carrying air-conditioned sleepers or parlor cars, besides additional

sleeping and parlor cars for use on trains between Montreal and Quebec, Montreal and Ottawa, Toronto and Ottawa, and trains 29 and 40 between Montreal and Saint John, N.B. Air-conditioning of tourist cars for use on the transcontinental trains between Vancouver and Montreal and Toronto is a new and interesting feature of the 1937 programme. This will supplement last year's services which allowed air-conditioned standard sleepers, compartment-lounge, bedroom and parlor cars to be used on transcontinental trains between Montreal, Toronto, and Vancouver; the Montreal, Toronto, Hamilton, Chicago services; and the night trains between Montreal and Boston. Air-
